

RESEARCH METHODOLOGY CLASSES

TECHNO INDIA UNIVERSITY, WEST BENGAL

CONTENTS

1. Research in Business

- 1.1 Data Collectors face Responsibilities
- 1.2 Why Study Business Research?
- 1.3 Research Should Help Respond to Change
- 1.4 Business Research
- 1.5 Research Should Reduce Risk
- 1.6 What's Changing in Business that Influences Research
- 1.7 Computing Power and Speed
- 1.8 Business Planning Drives Business Research
- 1.9 Business Decisions and Research
- 1.10 Information Sources
- 1.11 Sources of Business Intelligence
- 1.12 Hierarchy of Business Decision Markers
- 1.13 Minute Main and Business Research
- 1.14 P&G has a World Class Research Department
- 1.15 Research May Not Be Necessary
- 1.16 Information Value Chain
- 1.17 The Research Process
- 1.18 Characteristics of Good Research
- 1.19 Categories of Research
- 1.20 Types of Studies
- 1.21 Business Research firms
- 1.22 Specialty Business Research Firms

2. Ethics in Business Research

- 2.1 Date Collectors Face Responsibilities
- 2.2 Types of Ethical Violations
- 2.3 Ethical Approaches
- 2.4 Ethical Issues at all Stages of the Research Process
- 2.5 Ethical Treatment of Participants
- 2.6 Components of Informed Consent
- 2.7 Characteristics of Informed Consent
- 2.8 Ethical Responsibility
- 2.9 Deception
- 2.10 Debriefing

- 2.11 Participant Confidentiality
- 2.12 Right to Privacy
- 2.13 The U.S. Safe Harbor Agreement
- 2.14 Confidentiality
- 2.15 What to Do If Coerced?
- 2.16 Effective Codes of Ethics

3. Thinking Like a Researcher

- 3.1 Language of Research
- 3.2 Job Redesign Constructs and Concepts
- 3.3 Operational Definitions
- 3.4 A variable is the Property Being Studied
- 3.5 Types of variables
- 3.6 Independent and Dependent Variable Synonyms
- 3.7 Relationships Among Variable Types
 - I. Moderating Variables (MV)
 - II. Extraneous Variables (EV)
 - III. Intervening Variables (IVV)
- 3.8 Proposition and Hypotheses
 - I. Hypothesis Formats
 - II. Relational Hypotheses
 - III. The Role of Hypotheses
 - IV. Characteristics of Strong Hypotheses
- 3.9 Theory within Research
- 3.10 The Role of Reasoning
- 3.11 A Model within Research
- 3.12 The Scientific Method
- 3.13 Sound Reasoning
- 3.14 Deductive Reasoning
- 3.15 Inductive Reasoning
- 3.16 Why Didn't Sales Increase?
- 3.17 Tracy's Performance

4. The Business Research Process

- 4.1 Curiosity Drives Research
- 4.2 Purpose of Research
- 4.3 Evaluating the Value of Research
- 4.4 Research Process
 - I. Clarifying the Research Question
 - II. Proposing Research

III. Designing the Research

IV. Data Collection

V. Data Characteristics

4.5 Data Analysis & Interpretation

4.6 Reporting the Results

5. Clarifying the Research Question through Secondary Data and Exploration

5.1 Clarifying the Research Question Reduces Information Overload

5.2 Exploratory Phase Search Strategy

5.3 Integration of Secondary Data into the Research Process

5.4 Objectives of Secondary Searches

5.5 Conducting a Literature Search

5.6 Level of Information

5.7 Integration Secondary Data

5.8 Information Sources

5.9 Evaluating Information Sources

5.10 The Evolution of Data Mining

I. Data Mining in Business

II. Data-Mining Process

5.11 Business Research Process

5.12 Stage1: Clarifying the Research Question

5.13 Management-Research Question Hierarchy

5.14 SalePro's Hierarchy

5.15 Formulating the Research question

5.16 Types of Management Questions

5.17 The Research Question

6. Experiments

6.1 Causal Evidence

6.2 Evaluation of Experiments

6.3 Experimentation in the Research Process

6.4 Conducting an Experiment

I. Placement of Benefits Module

6.5 Selecting and Assigning Participants

6.6 Random Assignment

6.7 Quota Matrix Example

6.8 Measurement Options

6.9 Validity in Experimentation

6.10 Threats to Internal Validity

6.11 Additional Threats to Internal validity

- 6.12 Threats to External Validity
- 6.13 Experiments Challenge Perceptions
- 6.14 Experimental Research Designs
 - I. After-Only Case Study
 - II. One Group Pretest posttest
 - III. Static Group Comparison
 - IV. Pretest Posttest Group Design
 - V. Posttest Only with Control Group
 - VI. Nonequivalent Control Group Design
 - VII. Separate Sample Pretest Posttest
 - VIII. Group Time Series Design
- 6.15 Job Enrichment Quasi Experiment
 - I. Experiment: Refining Store Design
 - II. Experiment: The Right Size of Flavor
- 6.16 Test Marketing Selection
- 6.17 Types of Test Markets

7. Surveys

- 7.1 Data Collection Approach
- 7.2 Selecting a Communication Data Collection Approach
- 7.3 Dilemma for Surveys
- 7.4 Communication Approach
- 7.5 Sources of Error
- 7.6 Participant Motivation
- 7.7 Response Terms
- 7.8 Communication Approaches
- 7.9 Self-Administered Surveys
- 7.10 Designing Questionnaires Using the TDM
- 7.11 Options for Web-based Surveys
- 7.12 Advantages of Surveying Software
- 7.13 The Web as a Survey Research Venue
- 7.14 Advantages of Self-Administered Study
- 7.15 Disadvantages of Self-Administered Study
- 7.16 Improving Response Rates
- 7.17 Telephone Survey
- 7.18 Disadvantages of the Telephone Survey
- 7.19 Survey via Personal Interview
- 7.20 Personal Interview Survey

8. Measurement

- 8.1 Measurement Will Vary Over Time
- 8.2 Measurement
- 8.3 Characteristics of Measurement
- 8.4 Level of Measurement
- 8.5 Types of Scales
 - I. Nominal Scales
 - II. Ordinal Scales
 - III. Interval Scales
 - IV. Ratio Scales
- 8.6 From Investigative to Measurement Questions
- 8.7 Sources of Error
- 8.8 Evaluating Measurement Tools
- 8.9 Validity Determinants
 - I. Increasing Content Validity
 - II. Increasing Construct Validity
 - III. Judging Criterion Validity
- 8.10 Understanding Validity and Reliability
- 8.11 Reliability Estimates
- 8.12 Practicality

9. Measurement Scales

- 9.1 Measurement are Relative
- 9.2 The Scaling Process
- 9.3 Nature of Attitudes
- 9.4 Improving Predictability
- 9.5 Selecting a Measurement Scale
- 9.6 Response Types
- 9.7 Number of Dimensions
- 9.8 Balanced or Unbalanced
- 9.9 Forced or Unforced Choices
- 9.10 Number of Scales Points
- 9.11 Rater Errors
- 9.12 Simple Category Scale
- 9.13 Multiple-Choice, Single-Response Scale
- 9.14 Multiple-Choice, Multiple-Response Scale
- 9.15 Likert Scale
- 9.16 Semantic Differential
- 9.17 Adapting Scales
- 9.18 SD Scale for Analyzing Actor Candidates
- 9.19 Graphic of SD Analysis

- 9.20 Numerical Scale
- 9.21 Multiple Rating List Scales
- 9.22 Stapel Scales
- 9.23 Constant-Sum Scales
- 9.24 Graphic Rating Scales
- 9.25 Ranking Scales
- 9.26 Paired-Comparison Scale
- 9.27 Forced Ranking Scales
- 9.28 Comparative Scales
- 9.29 Sorting
- 9.30 MindWriter Scaling
- 9.31 Ideal Scalogram Pattern
- 9.32 Key Terms

10. Questionnaires and Instruments

- 10.1 Measurement Skepticism
- 10.2 Overall Flowchart for Instrument Design
- 10.3 Flowchart for Instrument Design Phase 1
 - I. Strategic Concerns in Instrument Design
 - II. Technology Affects Questionnaire Development
 - III. Disguising Study Objectives
 - IV. Dummy Tables for American Eating Habits
- 10.4 Flowchart for Instrument Design Phase 2
 - I. Question Categories and Structure
 - II. Question Content
 - III. Question Wording
- 10.5 Response Strategy
 - I. Free-Response Strategy
 - II. Dichotomous Response Strategy
 - III. Multiple Response Strategy
 - IV. Checklist Response Strategy
 - V. Rating Response Strategy
 - VI. Ranking
 - VII. Summary of Scale Types
 - VIII. Internet Survey Scale Options
 - IX. Sources of Questions
- 10.6 Flowchart for Instrument Design Phase 3
 - I. Guidelines for Question Sequencing
 - II. Illustrating the Funnel Approach
 - III. Branching Question

IV. Components of Questionnaires

V. MindWriter Survey

10.7 Overcoming Instrument

10.8 Key Terms

11. Sampling

11.1 Small Samples Can Enlighten

11.2 The Nature of Sampling

11.3 Why Sample?

11.4 What Is a Sufficiently Large Sample?

11.5 When Is a Census Appropriate?

11.6 What Is a Valid Sample?

11.7 Sampling Design within the Research Process

11.8 Types of Sampling Designs

11.9 Steps in Sampling Design

11.10 When to use Large Sample?

11.11 Simple Random

11.12 Systematic

11.13 Stratified

11.14 Cluster

11.15 Stratified and Cluster Sampling

11.16 Area Sampling

11.17 Double Sampling

11.18 Nonprobability Samples

11.19 Nonprobability Sampling Methods

11.20 Determining Sample Size

11.21 Random Samples

11.22 Increasing Precision

11.23 Confidence Levels & the Normal Curve

11.24 Standard Errors

11.25 Central Limit Theorem

11.26 Estimates of Dining Visits

11.27 Calculating Sample Size for Questions Involving Means

11.28 Metro U Sample Size for Means

I. Proxies of the Population Dispersion

11.29 Metro U Sample Size for Proportions

11.30 Keynote Experiment

11.31 Random Samples

11.32 Confidence Levels

11.33 Metro U. Dining Club Study

12. **Data Preparation and Description**

- 12.1 Data Preparation in Research Process
- 12.2 Editing
- 12.3 Field Editing
- 12.4 Central Editing
- 12.5 Sample Codebook
- 12.6 Precoding
- 12.7 Coding : Open – Ended Questions
- 12.8 Coding Rules
- 12.9 Content Analysis
- 12.10 Types of Content Analysis
- 12.11 Open- Question Coding
- 12.12 Handling “Don’t Know” Responses
- 12.13 Data Entry
- 12.14 Missing Data
- 12.15 Describing Data Statistically
- 12.16 Frequencies
- 12.17 Distributions
- 12.18 Characteristics of Distributions
- 12.19 Measures of Central Tendency
- 12.20 Measures of Variability
- 12.21 Summarizing Distribution Shape
- 12.22 Symbols

13. **Exploring, Displaying and Examining Data**

- 13.1 Research as Competitive Advantage
- 13.2 Researcher Skill Improves Data Discovery
- 13.3 Exploratory Data Analysis
- 13.4 Data Exploration, Examination and Analysis in the Research Process
- 13.5 Research Values the Unexpected
- 13.6 Frequency of Ad Recall
- 13.7 Bar chart
- 13.8 Pie Chart
- 13.9 Frequency Table
- 13.10 Histogram
- 13.11 Stem-and-Leaf Display
- 13.12 Pareto Diagram
- 13.13 Boxplot Components
- 13.14 Diagnostics with Boxplots

- 13.15 Boxplot Comparison
- 13.16 Mapping
- 13.17 Geograph: Digital Camera Ownership
- 13.18 SPSS Cross- Tabulation
- 13.19 Percentages in Cross-Tabulation
- 13.20 Guidelines for Using Percentages
- 13.21 Cross-Tabulation with Control and Nested Variables
- 13.22 Automatic Interaction Detection (AID)
- 13.23 Exploratory Data Analysis
- 13.24 Working with Data Tables
- 13.25 Original Data Table
- 13.26 Arranged by Spending
- 13.27 Arranged by No. of Purchases
- 13.28 Arranged by Avg. Transaction, Highest
- 13.29 Arranged by Avg. Transaction, Lowest

14. **Hypothesis Testing**

- 14.1 Learning Objectives
- 14.2 Hypothesis Testing vs. Theory
- 14.3 Pulse Point: Research Revelation
- 14.4 Hypothesis Testing
- 14.5 Hypothesis Testing Finds Truth
- 14.6 Statistical Procedures
- 14.7 Hypothesis Testing and Research Process
- 14.8 When Data Present a Clear Picture
- 14.9 Approaches of Hypothesis Testing
- 14.10 Statistical Significance
- 14.11 Types of Hypotheses
- 14.12 Two-Tailed Test of Significance
- 14.13 One-Tailed Test of Significance
- 14.14 Decision Rule
- 14.15 Statistical Decisions
- 14.16 Probability of Making a Type I Error
- 14.17 Critical Values
- 14.18 Exhibit: Probability of Making A Type I Error
- 14.19 Factors Affecting Probability of committing a β Error
- 14.20 Probability of Making A Type II Error
- 14.21 Statistical Testing Procedures
- 14.22 Tests of Significance
- 14.23 Assumptions for Using Parametric Tests

- 14.24 Probability Plot
- 14.25 Advantages of Non parametric Test
- 14.26 How to Select a Test
- 14.27 Recommended Statistical Techniques
- 14.28 Question Answered by One-Sample Test
- 14.29 Parametric Tests
- 14.30 One- Sample Parametric Tests
- 14.31 Two- Sample Parametric Tests
- 14.32 SPSS Cross-Tabulation Procedure
- 14.33 Two-Related-Samples Tests
- 14.34 Sales Data for Paired-Samples t-Test
- 14.35 SPSS Output for Paired-Samples t- Test
- 14.36 Related Samples Non parametric Tests: Mc Nemar Test
- 14.37 K-Independent-Samples Tests: ANOVA
- 14.38 Post Hoc: Scheffe's S Multiple Comparison Procedure

15. Measures of Association

- 15.1 Interval/ Ratio Data
- 15.2 Ordinal Data
- 15.3 Nominal Data
- 15.4 Researchers Search for Insights
- 15.5 Pearson's Product Moment Correlation r
- 15.6 Connections and Disconnection
- 15.7 Scatter plots of Relationships
- 15.8 Interpretation of Correlations
- 15.9 Interpretation of Coefficients
- 15.10 Comparison of Bivariate Linear Correlation and Regression
- 15.11 Prediction and Confidence Bands
- 15.12 Testing Goodness of Fit
- 15.13 Components of Variation
- 15.14 F Ratio in Regression
- 15.14 Coefficient of Determination: r^2
- 15.19 Chi-Square Based Measures
- 15.20 Statistical Alternatives for Ordinal Measures
- 15.21 KDL Data for Spearman's Rho

16. Multivariate Analysis

- 16.1 Classifying Multivariate Techniques

- 16.2 Right Questions. Trusted Insight.
- 16.3 Dependency Techniques
- 16.4 Uses of Multiple Regression
- 16.5 Generalized Regression Equation
- 16.6 Selection Methods
- 16.7 Evaluating and Dealing with Multicollinearity
- 16.8 Discriminant Analysis
- 16.9 MANOVA
- 16.10 Bartlett's Test
- 16.11 Structural Equation Modeling (SEM)
- 16.12 Concept Cards for Conjoint Sunglasses Study
- 16.13 Interdependency Techniques
- 16.14 Factor Analysis
- 16.15 Correlation Coefficients, Metro U MBA U Study
- 16.16 Cluster Analysis

17. Presenting Insights and Findings Written Report

- 17.1 Written Presentation and the Research Process
- 17.2 Guidelines for Short Reports
- 17.3 The Research Report
- 17.4 Report Modules
- 17.5 Prewriting Concerns
- 17.6 Types of Outlines
- 17.7 Grammar and Style Proofreader Results
- 17.8 Adjusting Pace
- 17.9 Considerations for Writing
- 17.10 Avoiding Overcrowded Text
- 17.11 Appropriate Data Displays
- 17.12 Sample Findings Page: Tabular
- 17.13 Charts for Written Reports
- 17.14 Components of a Whole or Frequency
- 17.15 Finding Page Templates
- 17.16 Appropriate Data Displays
- 17.17 Text Presentation
- 17.18 Alternative Text Presentation
- 17.19 Tabular Presentation
- 17.20 Pictograph
- 17.21 Geographs
- 17.22 3-D Graphs
- 17.23 Preparing & Written Report

18. Presenting Insights and Findings Oral Presentations

18.1 Oral Presentation and the Research Process

18.2 Model for Presentation Planning

18.3 Aristotle's Proofs

18.4 Questions Guide the Plan

18.5 Audience Analysis

18.6 Types of Learners

18.7 Psychological Principles

18.8 Web-based Presentation

18.9 Patterns of Organization

18.10 Support Checklist

18.11 Developing a Story

18.12 Visualization Tools

18.13 Design Flow Aids

18.14 Graphs for Oral

18.13 Ex for Better Slides

18.14 Modes of Delivery

18.15 Non Verbal Admonitions for Speaker

18.16 Causes of Anxiety

18.17 Speaker Behaviors to Avoid

18.18 Arrangements
